

Phase 5: Project Development Phase

Courier Management System (CMS)

6. Project Development Phase:

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Developing reports & dashboards
7. Setting up security with profiles, permission sets, and sharing
8. End-to-end application testing

Milestone 1: Salesforce Account

Introduction

New to Salesforce and unsure where to start? Curious how real business applications—like loan processing and payment tracking—can be built on the platform? You're in the right place.

Welcome to the Loan Management System project!

Salesforce offers powerful tools that help automate processes, improve accuracy, and manage customer operations with ease. In this project, you'll learn how Salesforce can streamline lending workflows—from borrower onboarding to loan approval, EMI tracking, and document verification.

What Is Salesforce ?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers. Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can

manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud.

Activity 1: Creating Developer Account

Creating a developer org in salesforce.

1. Go to <https://developersalesforce.com/signup>
2. On the sign up form, enter the following details :
3. First name & Last name
4. Email

The screenshot shows the Salesforce Developer Edition sign-up page. On the left, there's a blue banner with the text "Build for the Agentic Enterprise. Sign up for your Developer Edition." and a list of features: "Build AI agents with Agentforce, grounded in your data with Data 360", "Connect Claude Code, Cursor, or Codex to your org with hosted MCP", "Build in the browser with the Agentforce Vibes IDE - no setup required", "Drag-and-drop when you want it, Apex when you need it", and "60+ MCP tools and 30+ coding skills, ready out of the box". On the right, there's a white sign-up form titled "Sign up for your Developer Edition". The form includes fields for First name (Pallavi), Last name (S), Job title (Developer), Company (Sree Abiraami Arts and Sci...), Country/region (India), and Work email (sp2499338@gmail.com). There are checkboxes for "I agree to the Main Services Agreement - Developer Services, Salesforce Program Agreement, and API Terms of Service" and "Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure." A "Sign me up" button is at the bottom.

- 1) First name & Last name
- 2) Email
- 3) Job Title: Developer
- 4) Company: College Name
- 5) Country: India

Click on sign me up after filling these.

Activity 2 Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 10-30 mins and

sometimes 2 hours.

2. Click on Verify Account

3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

Milestone 2- Object:

What is an object?

Salesforce objects are database tables that permit you to store data that is specific to an

organization. It consists of fields (columns) and records (rows).

Custom Objects Created:

1. **Customer__c**– stores customer personal and contact information
2. **Shipment__c**– manages parcel details, source, destination, and tracking information
3. **Delivery_Agent__c**– maintains delivery agent profiles and branch details
4. **Branch__c**– represents courier branch offices
5. **Delivery_Update__c**– stores status updates for each shipment
6. **Invoice__c**– manages billing details for delivered shipments

Relationships:

Customer → Shipment (Lookup)

Shipment → Delivery_Agent (Lookup)

Delivery_Agent → Branch (Lookup)

Delivery_Update → Shipment (Master-Detail)

Invoice → Shipment (Lookup)

Steps to Implement :

Activity 1: Create Customer Object

1. Click Setup → Object Manager → Create → Custom Object

2. Enter the following details:

Label: Customer

Plural Label: Customers

Record Name: Customer Name (Text)

1. Under Optional Features:

Enable Allow Reports

Enable Track Field History

In Search Status check the box Allow Search

In Object Creation Options check the box Add Notes and Attachments related list to default page layout

1. Click Save.

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing [i](#)

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more.](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status

☐ In Development

☒ Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more.](#)

- ☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☒ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

Save Save & New Cancel

Activity 2: Create Shipment Object

1. Go to Setup → Object Manager → Create → Custom Object

2. Enter:

Label: Shipment

Plural Label: Shipments

Record Name: Tracking Number (Auto Number)

1. Example Format: SHP-{000000}

Starting Number: 0

2. Enable:

Allow Reports

Track Field History

1. Click Save

Activity 3: Create Delivery_Agent Object

1. Setup → Object Manager → Create → Custom Object

2. Enter:

Label: Delivery Agent

Plural Label: Delivery Agents

Record Name: Agent Name (Text)

1. Enable:

Allow Reports

Track Field History

1. Click Save

Activity 4: Create Branch Object

1. Setup → Object Manager → Create → Custom Object

2. Enter:

Label: Branch

Plural Label: Branches

Record Name: Branch Name (Text)

1. Enable:

Allow Reports

1. Click Save.

Activity 5: Create Delivery_Update Object

1. Setup → Object Manager → Create → Custom Object

2. Enter:

Label: Delivery Update

Plural Label: Delivery Updates

Record Name: Update Number (Auto Number)

1. Example Format: UPD-{0000}

Enter Starting number : 0

2. Enable:

Allow Reports

Track Field History

1. Click Save.

Activity 6: Create Invoice Object

1. Setup → Object Manager → Create → Custom Object

2. Enter:

Label: Invoice

Plural Label: Invoices

Record Name: Invoice Number (Auto Number)

1. Example Format: INV-{0000}

Enter Starting number: 0

2. Enable:

Allow Reports

Track Field History

1. Click Save

Milestone 3- Tabs

Tab:

Tabs in Salesforce help users view the information at a glance. It displays the data of objects and other web content in the application.

Activity 1: Creating a Tab for Customer Object

1. Click Home, type Tabs in Quick Find, and select Tabs.
2. Under Custom Object Tabs, click New.

3. For Object, select Customer.
4. For Tab Style, choose any icon.
5. Leave all default settings as they are.
6. Click Next, Next, and Save.

Activity 2: Creating a Tab for Shipment Object

1. Click Home, type Tabs in Quick Find, and select Tabs.
2. Under Custom Object Tabs, click New.
3. For Object, select Shipment.
4. Choose any Tab Style.
5. Keep defaults unchanged.
6. Click Next, Next, and Save.

Activity 3: Creating a Tab for Delivery Agent Object

1. Click Home, type Tabs in Quick Find, and select Tabs.
2. Under Custom Object Tabs, click New.
3. For Object, select Delivery Agent.
4. Pick any Tab Style.
5. Leave default settings.
6. Click Next, Next, and Save.

Activity 4: Creating a Tab for Branch Object

1. Click Home, type Tabs in Quick Find, and select Tabs.
2. Under Custom Object Tabs, click New.
3. For Object, select Branch.
4. Choose any Tab Style.
5. Keep all defaults.
6. Click Next, Next, and Save.

Activity 5: Creating a Tab for Delivery Update Object

1. Click Home, type Tabs in Quick Find, and select Tabs.
2. Under Custom Object Tabs, click New.
3. For Object, select Delivery Update.
4. Select any Tab Style.

5. Keep default configurations.
6. Click Next, Next, and Save.

Activity 6: Creating a Tab for Invoice Object

1. Click Home, type Tabs in Quick Find, and select Tabs.
2. Under Custom Object Tabs, click New.
3. For Object, select Invoice.
4. Select any Tab Style.
5. Leave defaults unchanged.
6. Click Next, Next, and Save.

Milestone 4 Fields & Relationships

What are fields ?

Fields in Salesforce represent what the columns represent in relational databases. It can store

data values which are required for a particular object in a record.

Activity 1: Creation of fields for the Customer Object

Field Name	API Name	Data Type	Required	Description
------------	----------	-----------	----------	-------------

Customer Name	Name	Text	Yes	Full name of customer
Email	Email__c	Email	Yes	Customer email
Phone	Phone__c	Phone	Yes	Customer contact number
Address	Address__c	Text Area	Yes	Customer address
Customer Type	Customer_Type__c	Picklist	Yes	Regular/ Business
City	City__c	Text	No	Customer city
State	State__c	Text	No	Customer state
Pincode	Pincode__c	Text	No	Postal code
Is Active	Is_Active__c	Checkbox	No	Active status

1. Email (Email Field)

Go to Setup → Object Manager → Customer__c

Click Fields & Relationships → New

Select Email → Next

Field Label: Email

Check the Required box

Click Next → Next → Save

2. Phone (Phone Field)

Setup → Object Manager → Customer__c

Fields & Relationships → New

Select Phone → Next

Field Label: Phone

Check Required

Click Next → Next → Save

3. Address (Text Area)

Setup → Object Manager → Customer__c

Fields & Relationships → New

Select Textarea → Next

Field Label: Address

Check Required

Save

4. Customer Type (Picklist)

Setup → Customer__c → Fields → New

Picklist → Next

Field Label: Customer Type

Enter values:

Regular

Business

Check Required

Save

5. City (Text)

Setup → Customer__c → Fields → New

Text → Next

Field LabelCity

Save

6. State (Text)

Setup → Customer__c → Fields → New

Text → Next

Field Label**State**

Save

7. Pincode (Text)

Setup → Customer__c → Fields → New

Text → Next

Field Label**Pincode**

Save

8. Is Active (Checkbox)

Setup → Customer__c → Fields → New

Checkbox → Next

Field Label**Is Active**

Save

Activity 2: Creation of fields for the Shipment Object

Field Name	API Name	Data Type	Required	Description
Tracking Number	Name	Auto Number	Yes	Unique ID
Customer	Customer__c	Lookup(Customer)	Yes	Related customer

Source Address	Source_Address__c	Text Area	Yes	Pickup location
Destination Address	Destination_Addresses__c	Text Area	Yes	Delivery location
Weight	Weight__c	Number	Yes	Parcel weight
Price	Price__c	Currency	Yes	Shipping charge
Status	Status__c	Picklist	Yes	Shipment status
Expected Date	Expected_Date__c	Date	Yes	Delivery estimate
Assigned Agent	Assigned_Agent__c	Lookup(Delivery_Agent__c)	No	Delivery agent
Shipment Type	Shipment_Type__c	Picklist	Yes	Domestic/ International

1. Source Address (Text Area)

Setup → Shipment__c → Fields → New

Textarea → Next

Field Label **Source Address**

Required → Save

2. Destination Address (Text Area)

Setup → Shipment__c → Fields → New

Textarea → Next

Field Label **Destination Address**

Required → Save

3. Weight (Number)

Number → Next

Field Label **Weight**

Required → Save

4. Price (Currency)

Setup → Shipment__c → Fields → New

Currency → Next

Field Label **Price**

Required → Save

5. Status (Picklist)

Values:

Booked

In Transit

Out for Delivery

Delivered

Cancelled

Required → Save

6. Expected Date (Date)

Setup → Shipment__c → Fields → New

Date → Next

Field Label **Expected Date**

Required → Save

7. Shipment Type (Picklist)

Values:

Domestic

International

Required → Save

Activity 3: Creation of fields for Delivery_Agent Object

Field Name	API Name	Data Type	Required
Agent Name	Name	Text	Yes
Email	Email__c	Email	Yes
Phone	Phone__c	Phone	Yes
Branch	Branch__c	Lookup	Yes
Status	Status__c	Picklist	Yes
Joining Date	Joining_Date__c	Date	No

1. Email

Setup → Delivery_Agent__c → Fields → New

Email → Next

Field Label: Email

Required → Save

2. Phone

Setup → Delivery_Agent__c → Fields → New

Phone → Next

Field Label: Phone

Required → Save

3. Status (Picklist)

Values:

Active

Inactive

On Leave

Required → Save

4. Joining Date

Setup → Delivery_Agent__c → Fields → New

Date → Next

Field Label: Joining Date

Save

Activity 4: Creation of fields for Branch Object

Field Name	API Name	Data Type	Required
Branch Name	Name	Text	Yes
Branch Code	Branch_Code__c	Text	Yes

City	City__c	Text	Yes
State	State__c	Text	Yes
Manager Name	Manager_Name__c	Text	No

Create each field using:

Setup → Branch__c → Fields → New

Select respective Data Type

Enter Field Label

Save

(Repeat for all fields)

Activity 5: Creation of fields for Delivery_Update Object

Field Name	API Name	Data Type	Required
Update Number	Name	Auto Number	Yes
Shipment	Shipment__c	Master-Detail	Yes
Status	Status__c	Picklist	Yes
Update Date	Update_Date__c	DateTime	Yes
Remarks	Remarks__c	Text	No

Status Picklist Values:

In Transit

Out for Delivery

Delivered

Delayed

Required → Save

Activity 6: Creation of fields for Invoice Object

Field Name	API Name	Data Type	Required
Invoice Number	Name	Auto Number	Yes
Shipment	Shipment__c	Lookup	Yes
Amount	Amount__c	Currency	Yes
Invoice Date	Invoice_Date__c	Date	Yes
Payment Status	Payment_Status__c	Picklist	Yes

Payment Status Values

Paid

Unpaid

Pending

Required → Save

Relationships :

Child Object	Field	Parent Object	Type
Shipment	Customer__c	Customer	Lookup
Shipment			Lookup

	Assigned_Agent__c	Delivery_Agent	
Delivery_Agent	Branch__c	Branch	Lookup
Delivery_Update	Shipment__c	Shipment	Master-Detail
Invoice	Shipment__c	Shipment	Lookup

Relationship Creation Steps :

Activity 1 – Shipment → Customer

Setup → Shipment__c → Fields → New

Lookup Relationship

Related Object:**Customer__c**

Field Label**Customer**

Save

Activity 2 – Shipment → Delivery Agent

Setup → Shipment__c

New → Lookup

Activity 4 – Delivery Update → Shipment

Setup → Delivery_Update__c

New → **Master-Detail**

Related Object:**Shipment__c**

Save

Activity 5 – Invoice → Shipment

Setup → Invoice__c

New → Lookup

Object:**Shipment__c**

Save

Milestone 5-Validation Rules :

Validation rules are applied when a user tries to save a record and are used to check if the data meets specified criteria. If the criteria are not met, the validation rule triggers an error message and prevents the user from saving the record until the issues are resolved.

Activity 1: Create Validation Rules on Customer__c

1. Validation Rule: Email Must Not Be Blank

Steps:

Click the Gear icon → Setup

Go to Object Manager

Search and select Customer__c

From the left menu, click Validation Rules

Click New

Rule Name: Email_Required

Check Active

In Error Condition Formula, paste:

ISBLANK(Email__c)

Click Check Syntax

Error Message: Email is required.

Error Location: Field → Email

Click Save.

2. Validation Rule: Phone Must Be 10 Digits

Steps:

Setup → Object Manager → Customer__c

Validation Rules → New

Rule Name: Validate_Phone_Number

Check Active

Formula:

LEN(Phone__c) <> 10

Check Syntax

Error Message **Phone number must be 10 digits.**

Error Location: Field → Phone

Save

3. Validation Rule: Pincode Must Be 6 Digits

Steps:

Setup → Object Manager → Customer__c

Validation Rules → New

Rule Name: Validate_Pincode

Active → Yes

Formula:

LEN(Pincode__c) <> 6

Error Message **Pincode must be 6 digits.**

Location: Field → Pincode

Save

Activity 2: Create Validation Rules on Shipment__c

1. Validation Rule: Weight Must Be Greater Than Zero

Steps:

Setup → Object Manager → Shipment__c

Click Validation Rules → New

Rule Name: Validate_Weight

Active → Checked

Formula:

Weight__c <= 0

Check Syntax

Error Message: **Weight must be greater than zero.**

Location: Field → Weight

Save

2. Validation Rule: Price Must Be Greater Than Zero**Steps:**

Setup → Object Manager → Shipment__c

Validation Rules → New

Rule Name: Validate_Price

Active → Yes

Formula:

Price__c <= 0

Error Message: **Price must be greater than zero.**

Location: Field → Price

Save

3. Validation Rule: Expected Date Cannot Be in the Past

Steps:

Setup → Object Manager → Shipment__c

Validation Rules → New

Rule Name: Validate_Expected_Date

Formula:

Expected_Date__c < TODAY()

Check Syntax

Error**Expected delivery date cannot be in the past.**

Location: Field → Expected Date

Save

Activity 3: Create Validation Rules on Delivery_Agent__c

1. Validation Rule: Email Must Be Valid

Steps:

Setup → Object Manager → Delivery_Agent__c

Validation Rules → New

Rule Name: Validate_Agent_Email

Active → Yes

Formula:

NOT(CONTAINS(Email__c, "@"))

Error Message **Enter a valid email address.**

Location: Field → Email

Save

Activity 4: Create Validation Rules on Branch__c

1. Validation Rule: Branch Code Must Not Be Blank

Steps:

Setup → Object Manager → Branch__c

Validation Rules → New

Rule Name: Branch_Code_Required

Formula:

ISBLANK(Branch_Code__c)

Error Message **Branch Code is mandatory.**

Location: Field → Branch Code

Save

Activity 5: Create Validation Rules on Delivery_Update__c

1. Validation Rule: Remarks Required If Status is Delayed

Steps:

Setup → Object Manager → Delivery_Update__c

Validation Rules → New

Rule Name: Remarks_Required_For_Delay

Formula:

```
AND(  
  ISPICKVAL(Status__c, "Delayed"),  
  ISBLANK(Remarks__c)  
)
```

Error Message **Remarks are required when status is Delayed.**

Location: Field → Remarks

Save

Milestone 6 - Page Layouts :

Page Layouts in Salesforce control what a user sees on a record page and how information is organized.

They help structure fields, sections, buttons, related lists, and other components in a clean and user-friendly way.

By customizing page layouts, we ensure that users can easily enter, update, and view the required data.

Activity 1: Edit Page Layout for Customer__c

Steps:

Setup → Object Manager → Customer__c

Click Page Layouts

Click the default layout (usually Customer Layout)

Sections to Add & Arrange:

Open the default layout

In the top palette, click “Section”

Drag the Section and drop it anywhere on the layout

A pop-up appears → Fill details:

Section Name: “Customer Information”

Layout:

1-Column or

2-Column (recommended)

Tab-Key Order: Top-Down

Click OK

The new section will appear on the layout.

Drop fields inside the section (it will highlight).

Repeat the same for each field.

Section 1: Customer Information

Customer Name

Customer Type

Email

Phone

Is Active

Section 2: Address Details

Address

City

State

Pincode

1. Edit the layout as needed
2. Click Save.

Activity 2: Edit Page Layout for Shipment__c

Steps:

Setup → Object Manager → Shipment__c

Click Page Layouts

Open the default Shipment Layout

Sections to Add:

Section 1: Shipment Details

Tracking Number

Customer

Shipment Type

Weight

Price

Status

Section 2: Address Information

Source Address

Destination Address

Section 3: Delivery Information

Expected Date

Assigned Agent
Arrange fields properly

Click Save

Activity 3: Edit Page Layout for Delivery_Agent__c

Steps:

Setup → Object Manager → Delivery_Agent__c

Page Layouts

Open default Delivery Agent Layout

Arrange Fields:

Agent Details

Agent Name

Email

Phone

Branch

Status

Joining Date

Additional Information

Related Shipments

Related Delivery Updates

Edit → Save

Activity 4: Edit Page Layout for Branch__c

Steps:

Setup → Object Manager → Branch__c

Page Layouts

Open default Branch Layout

Sections:

Branch Information

Branch Name

Branch Code

City

State

Manager Name

Arrange fields

Click Save

Activity 5: Edit Page Layout for Delivery_Update__c

Steps:

Setup → Object Manager → Delivery_Update__c

Page Layouts

Open default Delivery Update Layout

Sections:

Update Information

Update Number

Shipment

Status

Update Date

Remarks

Arrange properly

Click **Save**

Activity 6: Edit Page Layout for Invoice__c

Steps:

Setup → Object Manager → Invoice__c

Page Layouts

Open default Invoice Layout

Sections:

Invoice Details

Invoice Number

Shipment

Amount

Invoice Date

Payment Status

Arrange fields as needed

Click Save

Milestone 7 - Flows

In Salesforce, a flow is a powerful tool that allows you to automate business processes, collect and update data, and guide users through a series of screens or steps. Flows are built using a visual interface and can be created without any coding knowledge.

Activity 1: Auto-Update Shipment Status When Delivery Update is Created

Scenario:

Whenever a Delivery_Update__c record is created, automatically update the related Shipment__c Status with the latest status from Delivery Update.

Part 1: Create the Record-Triggered Flow

Step 1: Open Flow Builder

Click the Gear Icon → Click Setup

In the Quick Find box (left side), type Flows

Click Flows

Click the New Flow button

Select Record-Triggered Flow

Click Create

Step 2: Configure the Start (Trigger)

On the Start panel on the right:

Object: select Delivery_Update__c

Trigger the Flow When:

Select A record is created

Condition Requirements:

Choose: None (Always Run the Flow)

Optimize the Flow For:

Select Actions and Related Records

Click Done

Part 2: Update Related Shipment Record

Step 3: Add “Update Records” Element

Click the + icon under the Start element

Select Update Records

Configure the Update Records Element:

Label: Update_Shipment_Status

How to Find Records to Update:

Select Specify conditions to identify records

Set Filter Conditions:

Object: Shipment__c

Field: Id

Operator: Equals

Value: {!\$Record.Shipment__c}

(This means update the Shipment linked to the Delivery Update)

Set Field Values to Update

Add field mapping:

Shipment Field	Value Source
Status__c	{! \$Record.Status__c}

(This copies status from Delivery Update to Shipment)

Click Done

Part 3: Save and Activate

Step 4: Save Flow

Click Save (top-right)

Flow Label: Auto_Update_Shipment_Status

API Name will auto-fill

Click Save

Step 5: Activate Flow

Click Activate

Flow status should show Active

Final Flow Layout:

Milestone 8 - The Lightning App :

What is an App ?

Apps in Salesforce are a group of tabs that help the application function by working together

as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just

two tabs.

Activity 1: Create a Lightning App

Create the Courier Management System App

1. From Setup, enter App Manager in the Quick Find and select App Manager.

2. Click New Lightning App.

Enter the Courier Management System as the App Name.

3. Upload an image or icon for the app, then click Next.

New Lightning App

App Details & Branding

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

☐ Use the app's image and color instead of the org's custom theme

Next

- Under App Options, leave the default selections and click Next.
- Under Utility Items, leave as it is and click Next.
- From Available Items, select the following and move them to Selected Items:

Customer

Shipment

Delivery Agent

Branch

Delivery Update

Invoice

Reports

Dashboards

7. Click Next.

8.

New Lightning App

User Profiles

Choose the user profiles that can access this app.

Available Profiles

- Analytics Cloud Integration User
- Analytics Cloud Security User
- Anypoint Integration
- Authenticated Website
- Authenticated Website
- B2B Reordering Portal Buyer Profile

Selected Profiles

System Administrator

Save & Finish

From Available Profiles, select System Administrator and move it to Selected Profiles.

9. Click Save & Finish.

Milestone 9- Profile:

What is a profile?

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. A profile controls “Object permissions, Field permissions, User permissions, Tab

settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types,

Login hours & Login IP ranges.

A profile can be assigned to many users, but users can be assigned a single profile at a time.

Activity 1: Create a Custom Profile – Courier Admin

Create a Custom Profile:

1. From Setup, enter Profiles in the Quick Find box.
2. Click Profiles.

3.

The screenshot shows the Salesforce Setup interface. The left sidebar has a search bar with 'profil' entered and a list of items including 'Users' and 'Profiles'. The main content area is titled 'Profiles' and shows a table of existing profiles. The table has columns for 'Action', 'Profile Name', and 'User License'. The 'New Profile' button is visible at the top of the table.

Action	Profile Name	User License
Edit Clone	Analytics Cloud Integration User	Analytics Cloud Integration User
Edit Clone	Analytics Cloud Security User	Analytics Cloud Integration User
Edit Clone	Anypoint Integration	Identity

Click New Profile.

4. Select Existing Profile as: System Administrator.
5. Enter Profile Name: Courier Admin.

6. Click Save.

The screenshot shows the 'Clone Profile' dialog box in Salesforce. At the top, there's a header with a user icon, the word 'SETUP', and 'Profiles'. Below this, the title 'Clone Profile' is followed by a 'Help for this Page' link. A prompt says 'Enter the name of the new profile.' The main form area has a message: 'You must select an existing profile to clone from.' followed by a dropdown menu for 'Existing Profile' (currently showing 'System Administrator'), a 'User License' field (showing 'Salesforce'), and a 'Profile Name' text input (containing 'Courier Admin'). A second, identical section is visible below. At the bottom, there are 'Save' and 'Cancel' buttons.

Why use System Administrator as Base?

It already has:

- Modify All Data

- Customize Application

- Full CRUD access on all objects

By cloning it, the **Courier Admin profile automatically inherits full access**
You can later restrict permissions if required.

Activity 2: Create a Custom Profile – Branch Manager

Steps:

1. From Setup, enter Profiles in the Quick Find box.
2. Click Profiles.
3. Click New Profile.
4. Select Existing Profile as: Standard Platform User.
5. Enter Profile Name: Branch Manager.

6. Click Save.
7. Click Edit on the Branch Manager profile.

Set App & Tab Settings

Under Assigned Apps / Custom App Settings, set the default app to:

Courier Management System App

Ensure Visible Tabs Include:

Set these tabs as Default On or Visible:

Customers

Final Profiles Created in Project :

Profile Name	Purpose
Courier Admin	Full system control
Branch Manager	Manage shipments and agents
Delivery Agent	Update delivery status
Customer Support	Handle customers and tracking

Milestone 10- Role:

In Salesforce, roles are used to determine which users have access to certain data and functions within the system. They are also used to define the reporting hierarchy within an organization. Users with higher roles have greater access to data and more control over the system.

Activity 1: Creation of Courier Admin Role

Creation of Role:

1. From the Quick Find box, search for Roles and click on the Roles option.

2.

Set Up Roles

☐ Don't show this page again

Select

3. Click on Expand All and click Add Role under CEO.

Creating the Role Hierarchy

You can build on the existing role hierarchy shown on this page. To insert a new role, click **Add Role**.

Your Organization's Role Hierarchy

[Collapse All](#) [Expand All](#)

- [-] Salesforce
 - [-] Add Role
 - [-] CEO [Edit](#) | [Del](#) | [Assign](#)
 - [-] Add Role
 - [-] CFO [Edit](#) | [Del](#) | [Assign](#)
 - [-] Add Role
 - [-] COO [Edit](#) | [Del](#) | [Assign](#)
 - [-] Add Role
 - [-] SVP, Customer Service & Support [Edit](#) | [Del](#) | [Assign](#)
 - [-] Add Role
 - [-] Customer Support, International [Edit](#) | [Del](#) | [Assign](#)
 - [-] Add Role
 - [-] Customer Support, North America [Edit](#) | [Del](#) | [Assign](#)

 - [-] Add Role
 - [-] VP, International Sales [Edit](#) | [Del](#) | [Assign](#)

4. Give Label as “Courier Admin”.

The Role Name will auto-populate.

5. Click Save.

Activity 2: Creating Branch Manager Role Under Courier Admin Role

Create another role:

1. Create a role with the name “Branch Manager”.
2. Below the Courier Admin, click on Add Role.
3. Enter the label name as “Branch Manager” and the Role Name will automatically populate.
4. Click Save.

Activity 3: Creating Delivery Agent Role Under Branch Manager Role

Steps:

1. Below the Branch Manager role, click on Add Role.
2. Enter Label as “Delivery Agent”.

Role Name will auto-populate.

3. Click Save.

Activity 4: Creating Customer Support Role Under Branch Manager

Steps:

1. Under the Branch Manager role, click on Add Role.
2. Enter Label as “Customer Support”.

3. Role Name will automatically populate.
4. Click Save.

Purpose of This Hierarchy :

Courier Admin- Highest level access to all data

Branch Manager- Manages branch-level operations

Delivery Agent- Access only to assigned shipments

Customer Support- Limited access to customer and shipment tracking

This hierarchy ensures proper data sharing and security in the Courier Management System.

Milestone 11- User :

What is a user?

A user is anyone who logs in to Salesforce. Users are employees at your company, such as sales, reps, managers, and IT specialists, who need access to the company's records. Every user in Salesforce has a user account. The user account identifies the user, and the user account settings determine what features and records the user can access.

NOTE- As Salesforce license can only be used by 2 Users at a time in Dev Org, So If you don't find a salesforce license then deactivate a user who has a salesforce license Or change the license type from Salesforce to any other.

Activity 1: To Create a User

Steps:

1. From Setup, enter Users in the Quick Find box, then select Users.

2. Click New User.

The screenshot shows the Salesforce Setup interface. The left sidebar contains the navigation menu with 'Users' selected. The main content area displays the 'All Users' page, which includes a table of existing users. The table has columns for Action, Full Name, Alias, Username, Role, Active, and Profile. The users listed are Chatter Expert, EPIC_OrgFarm, Sush_Sushanth, User_Integration, and User_Security.

Action	Full Name	Alias	Username	Role	Active	Profile
Edit	Chatter Expert	Chatter	chatty.00d9k00006nwfuaau.00ve0v9gessa@chatter.salesforce.com		✓	Chatter Free User
Edit	EPIC_OrgFarm	OEPIG	epic.5908c21a1157@orgfarm.salesforce.com		✓	System Administrator
Edit	Sush_Sushanth	sus	sushanthj2805652@agentforce.com		✓	System Administrator
Edit	User_Integration	integ	integrations@00d9k00006nwfuaau.com		✓	Analytics Cloud Integration User
Edit	User_Security	sec	insightssecurity@00d9k00006nwfuaau.com		✓	Analytics Cloud Security User

Fill in the Fields:

Field Name	Value
First Name	Enter first name (Example: Ravi)
Last Name	Enter last name (Example: Kumar)
Alias	Give an alias name
Email ID	Enter your personal email ID
Username	Must be in the format: text@text.text and must be unique
Nickname	Give a nickname
Role	Select Courier Admin
User License	Salesforce
Profile	Courier Admin

3. Click Save.

Activity 2: Creating Other Users

Repeat the same steps as **Activity 1** for creating additional users.

Use the following details:

User Type	Role	User License	Profile
Branch Manager	Branch Manager	Salesforce	Branch Manager
Delivery Agent	Delivery Agent	Salesforce Platform	Delivery Agent
Customer Support	Customer Support	Salesforce Platform	Customer Support

Example:

To create a Branch Manager User:

Go to Setup → Users → New User

Fill details like:

Field	Example Value
First Name	Arjun
Last Name	Reddy
Email	arjun@gmail.com
Username	arjun.manager@cms.com
Role	Branch Manager
Profile	Branch Manager

Click Save

\

To Create Delivery Agent User:

Follow same steps with:

Role: Delivery Agent

Profile: Delivery Agent

To Create Customer Support User:

Role: Customer Support

Profile: Customer Support

Important Points

Every user must have:

Unique username

Valid email

Assigned Role

Assigned Profile

Profiles control permissions

Roles control data visibility

Milestone 15 : Reports & Dashboards

Reports and Dashboards help analyze business data and track courier operations efficiently.

Activity 1: Create Report Types

Step 1: Open Report Types

1. Click Gear Icon → Select Setup.
2. In Quick Find search Report Types.

Step 2: Create Shipment Report Type

Primary Object: Shipment__c

Label: Shipment Tracking Report

Category: Reports

Deployment Status: Deployed

Click Next → Save

Step 3: Create Customer Report Type

Primary Object: Customer__c

Label: Customer Summary Report

Category: Reports

Deployment Status: Deployed

Click Next → Save

Step 4: Create Agent Performance Report Type

Primary Object: Delivery_Agent__c

Label: Agent Performance Report

Category: Reports

Deployment Status: Deployed

Click Next → Save

Activity 2: Create Reports

Report 1: Shipment Status Summary Report

Step 1: Create the Report

1. Click App Launcher (9 dots) → Search Reports
2. Click New Report
3. Choose Shipment Tracking Report
4. Click Continue

Step 2: Add Columns

Add these fields:

Tracking Number

Customer

Status

Expected Date

Assigned Agent

Step 3: Add Filters

Show Me: All Shipments

Date Filter: This Month

Status Filter: Select specific Status (Optional)

Step 4: Group & Summarize

Group rows by Status__c

Add summary on Price

Step 5: Save Report

Click Save & Run

Name: Shipment Status Summary

Folder: CMS Reports

Report 2: Agent Performance Report

Step 1: Create Report

New Report → Choose Agent Performance Report

Click Continue

Step 2: Add Columns

Agent Name

Branch

Number of Shipments

Status

Step 3: Group Data

Group by Delivery_Agent__c

Step 4: Save Report

Name: Agent Performance Report

Folder: CMS Reports

Save & Run

Report 3: Revenue Report

Steps

Create report using Shipment Tracking Report Type

Add fields:

Tracking Number

Customer

Price

Invoice Status

Group by:

Branch

Month

Save as: Revenue by Branch Report

Activity 3: Create Dashboard

Step 1: Open Dashboards

1. Click App Launcher (9 dots)
2. Search Dashboards
3. Click New Dashboard

Step 2: Enter Dashboard Details

Name: Courier Management Dashboard

Folder: CMS Reports

Click Create

Activity 4: Add Dashboard Components

Component 1: Shipment Status Overview (Donut Chart)

1. Click+ Component
2. Choose report: Shipment Status Summary
3. Visual Type: Donut Chart
4. Click Add

Component 2: Agent Performance (Bar Chart)

Select report: Agent Performance Report

Chart Type: Bar Chart

Click Add

Component 3: Revenue by Branch (Column Chart)

Choose report: Revenue by Branch Report

Chart Type: Column Chart

Click Add

Activity 5: Save & Activate Dashboard

1. Click Save
2. Click Done

Share Dashboard With:

Courier Admin

Branch Managers

Customer Support Team
